TERMS

Cattle sell under the suggested Terms and Conditions of the American Angus Association and American Hereford Association. Terms of the sale are cash unless satisfactory credit arrangements have been made prior. Sale day announcements take precedence over printed material. The auctioneer will settle all disputes.

DELIVERY/PICKUP

Arrangements for pick-up must be made at settlement. Consignors will care for bulls for two weeks at no charge. After April 6, 2024, the cost will be \$3/head/day. Purchaser assumes the risk of death or injury immediately after the animal is sold. Insurance is recommended and can be arranged by Jensen Livestock Agency.

VIDEOS AND ONLINE BIDS

Bulls will not be going through a sale ring, they will be displayed at the sale site. The sale will be broadcast on DVAuction. Please register at DVAuction.com. Prior to the sale, videos will be available at OnTargetBullSale.com.

LIABILITY

All persons attending the sale do so at their own risk, and the owners and their agents assume no liability, legal or otherwise, for any accidents which may occur.

BREEDING GUARANTEES

Bulls and females are guaranteed to be breeders for the first 90-day breeding season with the exception of: 1) Injury or disease occurring to the animal after the time of purchase. 2) Gross negligence or willful misconduct on the part of the purchaser. If problems arise buyer must contact seller before any action, such as disposal, is taken.

GENOMIC TESTING

All Angus bulls and heifers, and Hereford bulls have been DNA tested. Hereford females that were tested are denoted with the GE-EPD logo. These animals all have genomic-enhanced EPDs, which provides a substantial improvement in EPD accuracy for conventional growth and carcass traits.

ULTRASOUND DATA

Ultrasound data will be available as a sale supplement online and at the sale.

Dear Friends,

Welcome! It is a pleasure to host the sale with our good friends Ken, Zita, Kirk and Lisa Duensing at our Bull Development Center north of Blue Rapids. Our family has been raising Herefords since 1937 and our breeding program has always been to produce efficient, productive cattle that will excel in the pasture and feedlot. We do like that package to be phenotypically eye appealing. We believe you can have it all — cattle with the numbers the industry is looking for and the look that can excel in the showing. We strive to produce easy-keeping, deep-bodied females that will raise the next herd bull for our customers' programs. As you will note on the sale bulls' names there are several with the grandkids' prefixes — this proves show heifers can produce bulls that will work in the real world.

SpringhillHerefords.com

Our goal is to raise cattle that are structurally sound, graze our native pastures and utilize crop residue at least 10 months of the year, have a calf every year unassisted and wean at a respectable weight. We have an extensive AI program that includes heifers bred to low birth-weight bulls then cleaned up for 60 days. Plus 90% of our cow herd is AI bred to moderate birth weight and growth bulls with acceptable carcass numbers. We utilize proven bulls but we're not afraid to sample a well-made young bull.

We are excited about the consistency and quality of this year's offering. We believe the bull offering represents our program quite well. It includes bulls designed for calving ease you can use comfortably on your replacement heifers and bulls with the growth and carcass numbers to use on cows. This year approximately 70% of the offering is homozygous polled. You will find our bulls are "people friendly." We take pride in producing solid cattle that will help make our customers' bottom line stronger. There's no doubt our breeding program's growth and improvement can be attributed to Dan's daily management and commitment. We are a family operation and everyone contributes their own unique talents. Our success would not be possible if it wasn't for family.

The bulls are fed using a bunkline delivery method. By making this switch five years ago, we can better observe bulls that may not be wanting to eat, as well as minimize those that may be over eating. We feel the bulls are much more consistent this year not only in their weight gain, but also in their condition.

As you review the offering you will note we have denoted Dams of Distinction (DOD), Sires of Distinction (SOD) and CHB Sires (CHB) in the pedigree. We've also bolded all EPDs that are ranked in the top 15% of the Hereford breed.

This year we again have a group of F1 females in our sale. Bull customers Bart and Dennis Thoreson are offering a nice group sired by Springhill Herefords bulls. Be sure to check them out on page 32.

We look forward to hosting you on March 16. If you have any questions, don't hesitate to contact any of us. We'll have the bulls in the pens by 10 a.m. Saturday. If you'd like to view them before the sale give us a call. Videos are available online at OnTargetBullSale.com. If you can't attend in person, the sale will be broadcast online on DVAuction.com.

Yours to profitable beef,
Dave Stump & Dan Schmidt

Thanks for the memories...

This year marks our 10th Annual On Target Bull Sale. As we celebrate our 10th sale, we will miss one of the constants who has been with us since the beginning. Gone too soon, we mourn the loss of our friend, ringman and fellow Hereford breeder, Scott McGee, who passed away last November.

For the Stump family, our friendship with Scott and the McGees started decades ago as the Stump girls and the McGee kids grew up showing Herefords together. Scott could light up any room, make anyone laugh and had a heart of gold. We appreciate his friendship, advice and great sense of humor.

Scott will be missed but his legacy will continue through his children and grandchildren.

Dear Customers, Neighbors and Friends,

The Alcove Angus Family invite you to our Annual Bull and Female Sale. This is our 26th annual bull sale and a milestone year — our 10th joint sale with Springhill Herefords. We are grateful for the support and advice we receive from them.

The animals will be available for viewing in the pens by 10 a.m. the day of the sale. If you would like to view bulls or heifers prior to sale day, give us a call and we would be glad to meet you and answer any questions you may have. Bulls will be at the bull facility; heifers will be at the ranch until sale day.

All Angus animals offered have had a Geneseek Angus GS test. The EPDs listed reflect the testing. They have been ultra-sounded, pelvic scored, vaccinated, and BVD tested. They are guaranteed PI negative. All bulls have been semen checked. Ultrasound data and pelvic scores for the bulls and heifers will be available the day of the sale. The ADG for all the Angus bulls was 3.24. Animals notated with the Targeting the Brand logo highlight the Angus with greater potential to produce calves meeting the most challenging specifications of the Certified Angus Beef brand. But just don't look at numbers, these animals have plenty of eye appeal also.

Angus Association has released a Functional Longevity research EPD. This EPD looks at not only how long the cow will stay in the herd but also how many calves they will produce during their lifetime. Since we participate in the MaternalPlus program we have been given the EPDs for our cows. Over 80% of our breeding cows are at or above breed average. The heifers being sold are all at or above breed average.

Our goal is to present a diverse group of bulls so that you can find the animal you need — be it calving ease, growth, carcass merit or a combination. We stress good disposition in our cattle. They are used to us walking among them throughout the year, so they are accustomed to being around humans. Our grandchildren love to “check the cows” so they need to be docile. We have an extensive AI program with almost all our cows and heifers being AI'd before being turned out with clean-up bulls. Ten different sires are represented in this offering. We are also offering a group of open yearling heifers that would be a great addition to your herd. Take a look at them.

The sale could not happen without the support of family, friends and vendors. In addition to the acknowledgements on the inside front cover we offer our thanks to the Gilligs for allowing the sale at their home place, JD's Catering for the great lunch, Denton Designs and Arbor Ink for the catalog, and family and friends for helping with the pies and hosting during the sale.

We look forward to seeing you on March 16th.

BEEF...SO WELL DONE... IT'S RARE

F1 HEIFERS SIRED BY SPRINGHILL HEREFORDS BULLS

These 12 heifers are the top end out of the Thoreson 65-head herd. They were born in March 2023 and weaned September 1. They are green tag vaccinated program along with calf hood tags all done by Twin Valley Vets in Dunlap, Iowa. Dewormed and poured in February 2024. Currently eating 7 lbs cracked corn hand fed with free choice all natural protein tubs and alfalfa/ brome grass hay. Very gentle. Their mothers are high percentage Angus cows and sired by Springhill Herefords bulls including Gunsmoke as well as sons of Cowboss and Kickstart.

**For more information about the F1s:
Bart Thoreson 712-790-9995 or Dennis Thoreson 712-898-7568**

**Alcove and Springhill bull diets were
supplemented with greatOPlus**

greatOPlus is manufactured using a patent-pending proprietary extrusion process, and contains high levels of omega-3 fatty acids to stimulate reproductive development and immune function.
